Fight Winter's Chill With TechNiche Ion Vest

Riding, working and hunting in cold weather is a chore itself, but you can stay warm and comfy in IonGear by TechNiche International. The TechNiche Ion vest is powered by rechargeable Lithium-Ion batteries and has five temperature settings to provide up to 12 hours of warmth to your core. Made with a wind- and rain-resistant outer shell and a soft fleece inner layer, the vest can be worn under a barn coat or riding jacket. Zippered pockets for use when worn as an outer layer. Loose horse hair and dirt won't adhere to the outer shell fabric and the heating elements can be removed so the vest can be laundered.

TechNiche Int., a newcomer to the equestrian clothing business, also makes battery-powered winter gloves and cooling products for hot weather. MSRP \$165.
