

# DryKewl™ vs. Inuteq

## DryKewl™ Vest

- Easy to use, ready in 3-4 mins
- Even distribution of water and evaporation throughout vest
- Machine washable
- Lighter than the Inuteq vest
- Replaceable cooling fabric for longer lifespan vest
- Last 4-8 hrs (dry in one day not three days so no storage or mildew issues)
  - removable insert makes it easy to dry and store
- No pooling of water at bottom of vest
- Technology (HyperKewl™) made in Europe
- Patented technology
- Completely dry when charged

## Inuteq

- Harder to use - water absorption is difficult (ready in 15-20 mins)
- Uneven absorption of water throughout vest, with water pooling at bottom of vest
- Vest stays wet for days - storage difficult
- Machine washable
- Completely dry when charged
- Vest is heavier
